PROFESSIONAL SUMMARY

Information Technology undergraduate (NIT Jalandhar) with hands-on experience building responsive, production-grade web applications using React.js, JavaScript, and modern frontend frameworks. Frontend Developer Intern with a track record of delivering scalable UI components, optimizing performance, and collaborating in cross-functional Agile teams. Strong foundation in Data Structures, Algorithms, Full-Stack Development, and Machine Learning, with 300+ problems solved on LeetCode and GeeksforGeeks. Seeking to apply strong problem-solving and engineering skills in a Software Engineering role.

TECHNICAL SKILLS

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Languages: C++, Python, JavaScript, SQL, C

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Vite, Axios

Backend: Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, Mongoose, MySQL, Firebase

Machine Learning: Scikit-learn, Pandas, NumPy

Tools & Platforms: Git, GitHub, VS Code, Postman, Streamlit, Power BI, Agile/Scrum

Relevant Coursework: Data Structures and Algorithms, Machine Learning, Data Science, Web Development

PROFESSIONAL EXPERIENCE

Front-End Developer Intern — AD Infocom Systems

Jun 2025 – Jul 2025

Maharashtra, India

- Developed responsive, cross-browser UI components using HTML, CSS, and JavaScript, improving usability across desktop and mobile devices.
- Collaborated with cross-functional engineering and design teams in an Agile environment to build scalable frontend solutions.
- Optimized page load performance and resolved UI/UX bugs, directly improving overall user experience and product stability.
- Consistently delivered responsive, production-ready webpages on schedule, meeting all project deadlines.

PROJECTS

SmartComplaint — Complaint Management System

React.js, Node.js, Express.js, MongoDB, JWT, Axios

- Developed a full-stack complaint management web application allowing users to register, log in, and submit/manage complaints through a user-friendly interface.
- Built the frontend using React.js and Vite, with client-side routing and API integration using Axios.
- Developed backend REST APIs using Node.js and Express.js, with JWT-based authentication and protected routes.
- Integrated MongoDB/Mongoose for storing user and complaint data and implemented middleware for authentication and request handling.
- Designed separate user/admin functionality to support complaint tracking and management.

Car Price Prediction System

Python, Scikit-learn, Pandas, NumPy, Streamlit | GitHub: Car Price Prediction

- Designed and deployed an end-to-end machine learning pipeline to predict used car prices from historical vehicle data.
- Performed data cleaning, feature engineering, and preprocessing to improve model accuracy and reliability.
- Evaluated multiple regression algorithms and selected the optimal model based on RMSE and R^2 score.
- Developed and deployed an interactive Streamlit web interface, enabling real-time, user-friendly price predictions.

EDUCATION

Dr. B.R. Ambedkar National Institute of Technology (NIT), Jalandhar

Jul 2023 – May 2027

Bachelor of Engineering in Information Technology

Meritorious Residential School, Amritsar (PSEB) — Class XII — 94%

Government Senior Secondary School (PSEB) — Class X — 87%

ACHIEVEMENTS

- Solved 300+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- Qualified a District-Level Competitive Examination, demonstrating strong academic aptitude and analytical ability.
